## TA2

## series

## - Industrial Motion

TiMOTION's TA2 series linear actuator is compact, robust and capable of performing well in certain outdoor environments. This linear actuator is perfect for use in small spaces where force or capability cannot be sacrificed. Options include feedback sensors, signal sending limit switches and 90 degree clevis mounting. Industry certifications for the TA2 linear actuator include IEC60601-1, ES60601-1, and EMC.

## Note

1 With a 12 V motor, the current is approximately twice the current measured in 24 V . With a 36 V motor, the current is approximately two-thirds the current measured in 24 V . With a 48 V motor, the current is approximately half the current measured in 24 V . Speed wil be similar for all the voltages.

2 This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMOTION control boxes have this feature built-in.

3 Current and speed: Tested average value when stretching in push direction.
4 Standard stroke: Min. $\geq 20 \mathrm{~mm}$, Max. please refer to below table.

| CODE | Load (N) | Max Stroke (mm) |

| C, D, H, K | $\leq 750$ | 800 |
